

Pacific Slush Machine 3 Tanks U Series

PRODUCT CODE NOT STATED | BRAND Pacific

TANK CAPACITY	OPERATING TEMPERATURE	POWER CONSUMPTION	VOLTAGE
3 x 3L	-2 to -10 C	1162W	220V/50Hz

PRODUCT OVERVIEW

The Pacific Slush Machine 3 Tanks U Series is a commercial-grade frozen beverage dispenser with three 3L BPA-free polycarbonate tanks, designed for juice and slush modes. It features electronic expansion valve control, adjustable stirring, LED lighting, and cooling to -10 C. The unit operates on 220V/50Hz, consumes 1162W, and uses R404a refrigerant.

KEY FEATURES

- Three BPA-free polycarbonate tanks resistant to cracking
- Electronic expansion valve system for precise tank control
- Adjustable stirring speeds for varying beverage consistency
